

STUDENT NAME: Lining, Khristine Joyce B.

DATE: May 17, 2025

STUDENT NUMBER: 202210993

INSTRUCTOR: Ma'am Sherilyn Fajutagana

INDIVIDUAL ACTIVITY

Interview 2 persons (one who is over 65 years old and one who is under 16 years old) about their experiences, attitude and expectations of computers.

Interview with **Mrs. Cherry Cynthia Lining**

For her, computers are absolutely powerful pieces of technology that almost basically runs the entire world although she admittedly has limited experience with them. Since she is not using computers aside from her smartphone on a daily basis, she finds using an actual personal computer to be difficult and quite complicated to learn. Most of the time when she needs to accomplish something that requires the use of computers, she asks her daughter (me) to do her task. She wishes to have computers that are as easy to use as her smartphone.

Interview with **Kassandra Audrie Gadon**

As a kid who is always playing online games both on her phone and on laptop, she finds computers to be very entertaining and easy to use.
